Digital Economy and Innovation Comparison: South Korea vs. New Zealand (2013–2023)

Digital Economy and Innovation Insights: A Comparative Analysis of South Korea, Brazil, and New Zealand (2013–2023)

The primary purpose of this report is to provide a comprehensive analysis of South Korea's digital economy and innovation landscape, with comparisons to Brazil and New Zealand, covering the years 2013 to 2023. By focusing on indicators such as R&D expenditure, internet penetration, ICT goods and services trade, and secure internet infrastructure, the report highlights each country's strengths, growth trends, and areas for improvement in their digital economies.

This analysis draws upon data from the World Bank, specifically targeting indicators that align with global goals for digital inclusion, innovation, and technological infrastructure. Custom visuals, such as dual-axis line charts, multi-line comparisons, and stacked area charts, were employed to clearly illustrate year-over-year trends and differences across key indicators. The report aims to inform stakeholders of South Korea's position in the global digital economy relative to developing (Brazil) and developed (New Zealand) peers, offering insights into how digital investments and technological growth contribute to economic resilience and competitiveness.
